

## Chapter 1167 The Function Of The Light Elemental...

As soon as the idea struck Liam, he didn't waste time. He immediately tried it.

He raised his sword and swung it again.

At this moment, the light elemental special power he was controlling lit up and merged into the blade of his sword.

A brilliant light burst from the blade.

Liam flicked his wrist forcefully, and the fused light from the Shadow Sword and the light elemental special power shot out, hitting the Zephyr Ape at an incredibly fast speed.

As soon as the light hit the ape, its hard skin was directly cut, creating a deep wound. Its purple blood immediately spurting out all over the place.

Indeed, the power of this light was as terrifying as Liam had expected. The damage the Shadow Sword had inflicted on the Zephyr Ape was significantly high.

Because of this, the Zephyr Ape looked at Liam with fear in its eyes.

Its strong defenses had always been effective against the other Primogem beasts. In fact, it relied on these defenses for survival. So, it hadn't expected that a human's attack could bypass its strong defenses.

As Liam watched the Zephyr Ape reel from severe injuries because of his powerful sword, he realized something important.

It turned out that the true purpose of the light elemental special power was empowerment.

Now, he finally realized why he had never been able to use this power to defeat any enemy.

To put it bluntly, the role of the light elemental special power was to support its holder. And this support was immensely powerful.

Then, Liam came up with another brilliant idea.

The function of the light elemental special power wasn't limited to empowering his Shadow Sword.

Liam took a deep breath and concentrated, using all his spiritual power to carefully control the light elemental special power within him.

The next moment, a white light surged from his body.

The light quickly condensed and turned into a linear attack. It was like a weapon perfectly suited to Liam's hand, which he controlled to directly hit the Zephyr Ape's body again.

This time, the light penetrated the Zephyr Ape's body.

Its speed was comparable to the speed of light. It was so fast that even a primogem beast like the Zephyr Ape couldn't dodge it.

However, although the light penetrated the Zephyr Ape's body, its injury wasn't severe because Liam's power was still much lower than the Zephyr Ape's.

But inflicting damage was not the main purpose of the light, anyway.

After the light pierced through the Zephyr Ape's body, Liam suddenly felt he was touching the ape's body with his own hands. This allowed him to use his life-draining ability from a distance!

With this discovery, Liam raised his hand without hesitation and remotely used the life-draining ability on the Zephyr Ape.

Instantly, he sucked out a vast amount of the Zephyr Ape's life force.

The life force was transferred to Liam's body through the beam of light, rapidly restoring his strength and health.

Although using the life-draining ability from a distance wasn't as effective as touching the enemy directly, Liam found it more convenient because it kept him in the safest position.

Indeed, it was not an exaggeration to say that to be able to drain someone's life force from a distance was a god-like ability.

This made Liam realize how powerful the light elemental special power was.

It really lived up to its reputation as the rarest and most formidable special power.

This power could actually supercharge all his attacks and significantly boost his overall strength.

After Liam discovered what the light elemental special power was capable of, his confidence soared.

The Zephyr Ape was merely a lab rat to him now.

The Zephyr Ape was helpless now. It could only feel that

Chapter 1167 The Function Of The L' 🎁 +120 Points at most  
the life force in his body was quickly draining away.

The Zephyr Ape struggled and resisted but to no avail. It couldn't escape its dire situation. It could only let Liam continue to drain its life force.

Its incapacity to deal with Liam finally caused the Zephyr Ape to panic.

It was only at this moment that the Zephyr Ape fully understood that Liam was an opponent it could not defeat.

There was an undisguised fear in its eyes. Then, its body shrank rapidly, apparently preparing to flee.

When Liam saw this, his eyes turned cold.

Of course, he could not let the Zephyr Ape escape, considering their deep-seated enmity.

Liam knew better than to let an enemy slip away.

So, he reached out and waved. The next moment, four beams of light flowed out of his hand, instantly immobilizing the Zephyr Ape.

However, Liam wasn't done yet. He quickly activated his gravitational magnetic field. Then, he applied it directly to the Zephyr Ape's body.

Instantly, the Zephyr Ape felt like its body was being crushed by a huge mountain.

It collapsed to the ground, and its entire face smashed into the dirt.

The Zephyr Ape's eyes were filled with terror. Obviously, it was now completely at Liam's mercy.
