

Chapter 1118 Survival

The Zephyr Ape kept pounding Liam, and each hit made Liam's injuries worse.

The fragment of the Heart of Life restored Liam's energy, but it wasn't enough. Liam's body couldn't take much more of this.

The healing power of the Heart of Life's fragment just couldn't keep up with the damage Zephyr Ape was dishing out.

Gradually, Liam began to lose his consciousness—his strength was fading, and he was getting groggy.

His heart was filled with a bitter sorrow now.

Was he going to die like this?

There was still so much he needed to do!

Liam thought of his family, his son, and his wife...

He could almost see Julie. She was standing in front of him, waving.

It seemed like she was saying that everything would be okay and that the three of them would reunite...

Liam cracked a weak smile. At that moment, he let go of everything, ready to accept whatever came next.

As he hovered on the edge of death, ready to let go, something deep inside him—the primogem part of his heart he had had since he was a kid—began to stir.

Liam thought of his family, his son, and his wife...

He could almost see Julie. She was standing in front of him, waving.

It seemed like she was saying that everything would be okay and that the three of them would reunite...

Liam cracked a weak smile. At that moment, he let go of everything, ready to accept whatever came next.

As he hovered on the edge of death, ready to let go, something deep inside him—the primogem part of his heart he had had since he was a kid—began to stir.

It was deeper within him than even the Heart of Life!

Suddenly, a burst of bright white light erupted from within him.

had opened up!

A surge of power exploded from Liam, its force so intense that it pushed the Zephyr Ape back. The creature's massive frame stumbled backward, skidding hundreds of meters across the ground!

Liam didn't waste time trying to figure out where this burst of strength had come from. His heart was racing with fear as he glanced at the Zephyr Ape.

The Zephyr Ape's strength was far beyond what Liam had expected. With its race's Origin Technique, even level-seven primogem beasts would not be able to defeat it. And Liam was nowhere near that level of power now!

But thanks to the mysterious force that had just saved him, Liam was still alive.

He didn't hesitate. With a quick movement skill, he put distance between himself and the Zephyr Ape.

The Zephyr Ape tried to catch up with Liam, but its energy was unstable now. All that disruption during its breakthrough had taken a toll, and now its speed was slower, due to Liam's unexpected power burst.

The Zephyr Ape could only watch as Liam ran further away.

Realizing it wasn't going to catch up with Liam, the Zephyr Ape stopped using its Origin Technique and shrank its massive body.

Interruptions during its breakthrough and the time-limited Origin Technique it had just used left it drained. The Zephyr Ape was too tired to maintain its previous state, and it could do nothing but let Liam get away.

The Zephyr Ape only felt better after it stopped using its Origin Technique. But it didn't take a breather; it charged ahead, still after Liam!

Its hatred for Liam was off the charts now.

The Zephyr Ape let out a furious roar as it thundered

down the path after Liam. "You can run, but I'll catch up with you! I'm going to tear you apart!"
