

Chapter 1251 Authorization

After discovering the "Legendary" level, Liam began to consider the authorization mentioned in his test results.

Upon inquiry, he found out that everyone who reached the Cosmic realm from their Celestial Realm started with only level-one authorization, which restricted movement to the planetary system where they ascended.

And Liam's level-two authorization allowed him to travel beyond his planetary system to adjacent ones.

This authorization was not permanent.

Primogem Warriors could enhance their level of authorization by earning points.

Liam had achieved level-two authorization by scoring "Legendary" on his test, which rewarded him with 1000 points.

Following this, Liam chose to keep his test results confidential.

Yet, despite his discretion, murmurs of Liam's exceptional talent spread among many, sparking envy.

Some, begrudging their own lesser abilities, refused to recognize Liam's prowess.

Christos overheard such talk.

Annoyed, he looked up and reprimanded, "What the hell are you talking about? Shut up! Speak another word, and you'll be barred from the Sanctuary of Human Sovereign!"

His warning brought immediate silence.

Those who had been speaking ill of Liam, motivated by their jealousy, decided it was better not to cross Christos.

Returning to his usual gentle self, Christos gave Liam a nod and a warm smile as he watched him depart.

After leaving, Liam turned to Lindy and asked, "Lindy, where to now?"

Lindy paused briefly before responding, "We're off to the task room at the Network of Human Sovereign next. It's important for you to get acquainted with it. Such rooms are scattered across the habitable planet. By completing the tasks there, you can earn various rewards. If you wish to undertake a task, you simply need to use the task station inside the room."

As they made their way to the task room, Lindy seized the opportunity to ask Liam, "Liam, is your test result at 'A' level?"

Lindy wasn't privy to the full scope of the Sanctuary of Human Sovereign's data, so she was unaware of Liam's exact scores.

The question clearly surprised Liam.

He hadn't expected Lindy to be curious about him.

Nonetheless, Liam saw no reason to hide his results from Lindy and openly shared them with her.

Lindy took a quick look at the results.

The brief glimpse was enough to paint a look of utter astonishment on her face.

Liam's potential was actually at the "Legendary" level!

Lindy was lost in thought. She muttered to herself, "Wow, there really is a Legendary level! Liam has the potential to become a legend. His future will be extraordinary!"

Lindy regarded Liam with newfound admiration now.

Adding to her astonishment, Liam had been granted a level-two authorization directly!

This clearly demonstrated that the benefits reserved for a "Legendary" talent far surpassed those at the "A" level.

In the Network of Human Sovereign, acquiring points was the most challenging task.

While the "A" level could yield up to 100 points, the "Legendary" level offered a staggering 1000 points as a reward!

Moreover, this bounty of 1000 points also marked the threshold for level-two authorization.

For a Primogem Warrior, accumulating such a massive number of points typically required years of completing tasks.

Chapter 1251 Authorization

 +120 Points at most

Lindy herself had put in considerable effort to reach level-two authorization.

Watching Liam effortlessly achieve this level sparked a hint of envy in Lindy.

Catching the expression on Lindy's face, Liam realized what she must be thinking and felt a touch of embarrassment.

He modestly said, "Lindy, the results of these tests are just temporary and don't dictate our future successes. I'm sure you'll achieve great things as well."
