

Read I Am A Quadrillionaire Chapter 1979

I am a quadrillionaire chapter 1979-“Celeste, step aside. I’ll go and see how the cold air in the ice cavern is formed.”

After David finished speaking, he walked to the center of the bottom of the ice cavern alone.

Then, he closed his eyes, released part of his mind power, and started to explore the entire ice cavern.

Since the ice cavern would become colder the deeper it went, the secret must be in the deepest part of it.

The mind power continued to extend down along the bottom layer of the ice cavern that was full of thick ice layers. The formation of these ice layers might have existed for longer than the Iridescent Sect itself.

It was very likely that the Iridescent Sect only came about after the ice cavern and forbidden area were formed.

When his mind power reached a depth of hundreds of thousands of kilometers, it finally stopped.

This ice layer was hundreds of thousands of kilometers thick.

How unimaginable.

One must know that the diameter of Earth was only more than 10 thousand kilometers.

Just the thickness of this ice layer could cover dozens of Earths.

When he reached the end, David saw a breathtaking scene using his mind power.

He saw a huge blue ice block not far away that seemed to be wrapped in something.

The cold air came from the thing inside.

It was definitely a rare treasure since it could form thousands of kilometers of ice.

The most shocking thing was underneath the blue ice was surging magma.

‘What is this?’

‘What a great contrast.’

There was only a one-line difference.

The top was frozen for thousands of miles, while the bottom was spewing magma.

It was the first time David had seen such a strange scene.

How could boiling magma and extremely cold ice exist in the same room?

Magma was synonymous with ultra-high temperature, but this ice cube did not show any trace of melting under the scorching heat.

The two sides had coexisted peacefully in this way for an unknown number of years.

The magma and ice block each occupied their own territory and did not interfere with each other.

‘What a rare sight!’

Standing at the bottom of the ice cavern, David opened his eyes.

A smile appeared on his face.

‘Wonderful!’

‘There’s clearly something good hiding in the blue ice.’

It was not David’s style to not take treasures when he came across them, especially when they belonged to the enemy. Therefore, there was no reason not to take it.

When she saw David opening his eyes, Celeste hurried over and asked, “David, how was it? Did you find anything?”

“Yeah, I found the culprit. There is a treasure under the ice layer. It’s the thing that emits the extreme cold air and is also what formed the ice cavern. If I take it out, the ice cavern will automatically disappear,” David replied.

“What treasure?” Celeste asked curiously.

“I don’t know yet. It’s hidden in a huge blue ice cube. Celeste, stand back a little bit and let me take it out. There might be a lot of movement.”

“Be careful!” Celeste said and retreated to the position just now.

David crouched down and looked down at the ice beneath his feet.

Clenching his right fist, he punched the ice and walked over to Celeste.

The two stood on the edge of the bottom floor of the ice cavern, looking at the center quietly.

Crack! Crack!

A small crack appeared in the ice layer, and slowly, the crack became bigger and bigger before quickly spreading to the deepest point of hundreds of thousands of kilometers.

At the same time, the mind power that dived into the ice layer materialized. It then wrapped around the huge blue ice cube, rose from the ground, and quickly went to the ground via the cracks.

Boom!

A loud sound came from underground.

Immediately afterward, the ground shook.

Not only could David and Celeste in the ice cavern feel it, the entire Iridescent Sect, and even the entire Iridescent Continent, felt the violent tremors.

Countless ordinary people stopped what they were doing.

They all yelled and ran away, trying to quickly find an open place where they could take cover.
