Read I Am A Quadrillionarire Chapter 2135

I am a quadrillionarire chapter 2135-Beanie had indeed lured her enemies away from their territory.

It appeared that she had handed the body of the Silver Flood Dragon to the two elders to take away, but this was actually just a veil.

The real Silver Flood Dragon was actually with her.

Although the value of Silver Flood Dragon was high, almost reaching 20 billion L Dollars, it was not worth the Chez family risking their lives to take action against Beanie.

What really made the Chez family decide to take action was the news from the spy that they planted within the Nacht family.

After buying the Silver Flood Dragon, Beanie discovered a Beast Crystal inside the Silver Flood Dragon.

The Beast Crystal was something that only beasts could form.

The chances of it having one were very small.

A hundred beasts might not even be able to condense into one Beast Crystal.

The reason why a Silver Flood Dragon's corpse was so expensive was due to the well-preserved parts. This crystal was just a valuable bonus.

On the other hand, if the corpse was complete and the crystal inside had not been found and extracted, it would not be a bad idea to gamble on the possibility of it having one for a little bit of extra money.

After all, if successful, one could make a lot of money from selling it.

The value of a Beast Crystal was extremely high.

It would be at least five or six times higher than the corpse.

What did this mean?

In other words, a complete Silver Flood Dragon was worth more than 10 billion if there was no premium, so the Beast Crystal of the Silver Flood Dragon would be worth hundreds of billions of L Dollars.

It would still be a little hard for families in third-tier cities like the Nacht family and the Chez family to fork out such a high price.

Even at this price, there was still no supply, and no one could freely buy it.

A Beast Crystal was comparable to some extremely precious elixirs. After being refined into a pill, it would be very helpful for the people in The Spirit Cage to improve their strength and break through their realm.

If their strength in The Spirit Cage was increased, it would directly affect their mind power in the real world.

Why was everyone swarming to The Spirit Cage?

It was to increase their mind power so that they could improve themselves faster in the real world.

The Spirit Cage was a virtual world at the end of the day.

Hence, most people would place more importance on the real world.

This was just a means for everyone to enhance their mind power.

The powerful families in Leila would usually divide their family members into several groups, and every once in a while, a new group of people would enter The Spirit Cage.

At the end of the day, most of their combat power was reserved for the real world.

There would also be special treatment for special circumstances.

For example, the direct descendants with strong talents, or family members who were about to break through, would stay longer.

Since the growth of mind power would bring them enough benefits, their families would allow such people to extend their time in The Spirit Cage.

Otherwise, they could only follow the family's arrangement.

A Beast Crystal, no matter if it was sold to those big powers in first-tier or second-tier cities, or kept for their own use, would bring huge value to the Nacht family.

That was why the Chez family was eyeing it and decided to unite with other forces to forcibly attack the Nacht family.

The Chez family did not want the Nacht family to grow stronger.

Due to this, they did not even hesitate to promise the others that once they killed Beanie and got the corpse of the Silver Flood Dragon, they would take out the Beast Crystal and hand it over to the collaborators.

The others could only agree to help the Ches family under the temptation of such huge interests.

Neither the Chez family nor the Nacht family said anything about the Crystal found in the Silver Flood Dragon, and they had not made it public.

Even so, everyone knew of it
