

## Read Novel Married At First Sight Chapter 2238

**Married at First Sight Chapter 2238**-She asked the waiter to help Chelsea and George.

Serenity also helped her sister. She took the opportunity to ask her sister: "Did Chelsea come here uninvited or did you invite her? Sister, I noticed that when Chelsea handed you a red envelope, she disagreed ten thousand times." Serenity laughed softly, "Seeing her sore face, I just want to laugh. She probably thought you wouldn't accept her red envelope."

Liberty also showed a little smile, and she said: "It was a red envelope from Sonny's grandparents that Chelsea brought here. Money, there are \$5,000 in the red envelope, Chelsea is an iron rooster, she likes to take the most advantage of it, so it is naturally painful. She is hoping that if I do not accept the red envelope, she will be able to get the \$5,000, and she will inform her parents when she returns that I have accepted it."

Serenity: "...It can still be like this, I didn't expect her to be like this. I have been an aunt with her for many years, and I know her well, she is that kind of person, no matter how kind you are to her, she will remember some kindness, but she will not stop taking advantage of you just because of your kindness."

Serenity said in a low voice, "Fortunately, we won the custody of Sonny at the beginning. If Sonny was left to them, I don't know what kind of upbringing he will be raised."

"I gave birth to Sonny, and I took him away. It is impossible to leave him to them. I will take Sonny to visit his father on the weekend for \$5000, and then return it to his grandparents. I don't want their money. The hospitalization this time probably wiped out all of the Brown family's wealth."

Hank was promoted and raised in the past few years, bought back, and half of the money he earned was given to her when the divorce was made, and the rest was used to renovate the wedding.

The money of the two elders used to subsidize the daughter's family.

Now that so much money could be spent to treat Hank, She's afraid that even the coffin had been spent.

Liberty didn't want their money.

But Chelsea couldn't be taken back, because Liberty couldn't trust this person.

"As long as they don't take advantage of Sonny to suck blood." What Serenity was most worried about was that when the Brown family became poor, they would hold on to Sonny and use him to suck blood.

Fortunately, Sonny was a three-year-old child.

If Sonny were an adult with a job and income and Hank was hospitalized, Sonny would not be able to do anything without payment, and Hank would not be able to return to work in a timely manner.

All these would be pressed on Sonny's body.
