

Read I am a quadrillionaire

I am a quadrillionaire chapter 2699-David had no time to care about Boundless Galaxy.

Even if the clone sent him some important information, he could only wait until he resolved the matter with Leila before he went back.

As time went by, David entered Leila's territory and headed towards Five Continent in the center.

He took the initiative to contact Sylvio, who told David that Lufian had not appeared yet and that Elora was also recovering her soul.

Since the trauma to Elora's soul this time was relatively serious, it would take some time for her to recover to the point where she could restore her body.

David would not go to bother her too.

Now that he had arrived in Leila, he could get to where Lufian was wreaking havoc immediately no matter where it was.

After some calculation, the day for the Elves' sacrificial ceremony was approaching.

David planned to go to the Elven Forest first to participate in the Elves' sacrificial ceremony.

Since he promised Elven Princess Evie, he must keep his promise. He was not someone who would go back on his word.

Moreover, while he had been on the road for more than a year, Evie would ask David where he was now and then.

She seemed to attach great importance to David's arrival, so naturally, David could not stand her up.

Besides that, there was another reason.

The Elven Forest, where the Elves lived, was on Five Continent, and Five Continent was at the center of Leila.

Once he got there, no matter which direction he had to go in Leila in the future, he could still get there in the shortest time.

Level 9 civilization Leila.

Five Continent, the Elven Forest.

As the centenary sacrificial ceremony of the Elves was approaching, the entire clan was very lively.

This was also the only time in a hundred years that the Elves had opened the Elven Forest to the outside world. Now, outsiders were allowed to enter and have close contact with the Elves.

Leila's countless forces would send people to participate too.

Among them were many powerful top forces.

Since each force could only send limited people to participate in the Elves' ceremony, the heirs of the major forces would even fight each other in order to compete for the places to participate.

No young person could resist the temptation of visiting the Elves.

In the future, it would also become a bragging capital.

Of course, those who could be sent to participate were the most valued heirs of each major force.

The top of the tallest tower in the Elven Forest.

Two Elven women, one older and one younger, who looked somewhat similar, were sitting together.

They were Elven Queen Isa and Elven Princess Evie.

"Evie, the day of the sacrificial ceremony is getting closer and closer. Everyone from Leila's major forces is almost here. Why hasn't David come yet?" Elven Queen Isa asked.

David was the protagonist in her plan. If the protagonist was not here, how could the plan continue?

Without outside help, it was almost impossible for the Elves to realize their desire for revenge.

The Vingean were not weak and they were at least much stronger than the Elves.
