

I am a quadrillionaire chapter 2731-In the small valley, at the junction of the Elven Forest and the Misty Forest, tens of thousands of Elven women were

rapidly collecting the Water of Life.

They were experienced in this.

Even though it was called a small valley, it was not that small.

It could accommodate tens of thousands of Elves to move freely inside at the same time, so how small could it be?

The Vingeans were hiding at the edge of the Misty Forest, quietly waiting for the Elves to collect the Water of Life.

After that, they would attack in one fell swoop to capture both the Elven woman and the Water of Life.

This would be a huge fortune.

The reason why they did not choose to act immediately was because the Water of Life was very delicate and could easily

evaporate if not stored well, so they had to use special means to collect it.

Only the Elves could collect the Water of Life without wasting any of it.

If the Vingeans were to collect the Water of Life, they could only get a third of it.

The Vingeans were not fools, so of course, they knew what to do to maximize their profits.

The best time to take action would be after the Elves had collected the Water of Life and were ready to evacuate.

Both tribes had their plans.

Elven Queen Isa was hiding in the dark while she waited patiently.

However, as time passed little by little, the collection of the Water of Life had reached the second half.

Isa's originally calm heart gradually became anxious.

According to the plan, Evie should appear in the small valley with David at this time.

Wherever the Water of Life appeared, the environment would be different from its surroundings.

For example, the Grand Canyon located deep in the Elven Forest was once an important source of the Water of Life.

The same went for the valley here.

Outside were dense vegetation and trees, but the inside of the valley was filled with the intoxication of a beautiful spring

day.

Countless insects and small animals considered this place a paradise.

If they stayed here for a long time, it would also be of great help to their growth.

Isa asked Evie to take David here to enjoy the scenery while watching the Elves collect the Water of Life.

David was the first person to receive this kind of treatment.

One must know that the Elves never invited outsiders to watch them collect the Water of Life

However, this was just superficial. Isa's real purpose was to have David witness how the Vingeans scumbags treated Elven

women, so that David would feel compassion.

Isa was very confident in her vision.

She knew that with David's character, he would never sit idly by.

However, now that the collection of the Water of Life had reached the second half, Evie and David were still not here. This

was making Isa very nervous.

Once they finished collecting the Water of Life, the Vingeans were bound to attack.

If the protagonist was not here then, what was the point?

Isa had put a lot of blood, sweat, and tears into this plan.

Not only were tens of thousands of Elven women dispatched, but she also exposed one location of the Water of Life.

If David did not come, all would be in vain.

Isa did not tell anyone except for Evie, a key figure in this plan.

Not even the elders of the Elves.

The entire clan was kept in the dark. Everyone thought she wanted to take back the Water of Life near the Misty Forest

while Leila's major forces were settling in the Elven Forest.

Presumably at this time, the Vingeans would not dare to do anything, so naturally, they fully supported this plan.

They just did not expect the Vingeans to take the risk, nor did they know that this was Queen Isa's plan.

Time continued to pass as Isa waited anxiously.

Soon, a voice broke the silence.

"Your Majesty, we have almost completed the collection for the Water of Life. We should prepare our return now.

Otherwise, if we are discovered by the Vingeans, those scumbags may suddenly come to stop us on a whim," a core

member of the Elves reported to Isa.

"Okay. Let's prepare for the return then. Pay attention. We all know the character of the Vingeans. We all know that in the

face of such a huge temptation interest, they might still attack us at all costs even at this critical time when the sacrificial

ceremony is about to be held. So, we must take all protective measures," Isa said in a deep voice.
