

Chapter 763 Rescued

As his body bobbed with the rise and fall of each wave, Liam had no idea how long he had been adrift.

It almost felt as if he was lost in a dream for a very long time.

In the dream, the Hoffman family was thriving, and Sergio was in robust health. There was also a couple Liam didn't recognize at first, but they radiated an air of familiarity. Presumably, it was his parents.

In addition to that, Julie and him were seen holding a young child's hands as they hung out together as a family. It was such a lovely, harmonious picture.

But, like all dreams, it would inevitably come to an end.

The next time he opened his eyes, he found himself in a strange room.

At first, Liam's vision was somewhat foggy, but the moment he tried to move his body, he was overcome with excruciating pain. In that instant, his senses cleared, and he regained full consciousness.

At the moment, he realized that he was covered from head to toe with bandages. At the same time, he was giving off a sour stench, much like some kind of

medicinal herb.

Looking around, he realized he was resting in a modestly decorated room. However, it had a cozy feel to it.

Liam propped his head up with a frown. Massaging his temples, he tried his best to piece together his memories of what happened at sea.

In view of his current situation, Liam surmised that he must have drifted to this location after the incident on the cruise ship and someone had rescued him after he was washed ashore.

Before long, footsteps could be heard outside the door.

A pair of woman and daughter were seen entering with a medicine bucket. Amidst their preparations to change Liam's bandages, they did not notice that he had awakened.

Liam could identify the sour smell that was similar to his, emanating from the mother-daughter pair. In fact, their odor was much stronger compared to his.

Soon, the young girl noticed that Liam had regained consciousness. She cried, "Mom, he has awakened!"

Upon seeing this, Liam instinctively tried to sit up and greet them politely.

In doing so, he was surprised to find that his body

seemed to have recovered much of its mobility.

Although it was still painful and not entirely comfortable, it represented a glimmer of hope for him.

At the same time, he was well aware that his body did not heal naturally on its own; instead it had something to do with them. Easing himself up, he replied, "Thank you for saving my life. I am forever in your debt. I will find a way to repay your kindness in the future."

The mother of the young girl waved her hand, indicating that Liam didn't need to thank them.

Liam continued to inquire, "I'd like to know how you cured me. Before this, I had lost all mobility in my limbs. However, it seems that I am on the mend."

Their answer was crucial to Liam because it was his only hope for revenge.

In response, the young girl pointed to the medicine bucket her mother was holding and said, "We used this stuff. The doctor who came earlier diagnosed you as having 'Power Imbalance Syndrome'. In simpler terms, there is a temporary loss of control over your abilities when there is a sudden and drastic change within your body. As such, it would cause temporary paralysis. This medicine should be able to help you achieve full recovery."

Liam was astonished. He was a top-tier doctor

himself, yet he had no idea about his own condition. It seemed that it was something that could be easily cured here.

He wondered where he was. The level of medical expertise here was simply extraordinary!

At this point, the mother of the young girl asked, "You were drifting at the edge of the island. Were you on a mission? It's a good thing you drifted here. Otherwise, it would have been dangerous!"

Her question hit Liam where it hurt the most. As he recalled the painful memories, a sense of desolation filled his eyes. Sighing, he replied, "It's a long story. I will slowly fill you in on it when I have the time."

Hearing this, the mother didn't press him for details. Instead, she said gently, "Now that you're stable, would you like us to take you back to the Salvation Society?"
