

The Ex-Husband's Revenge By Dragonsky

Chapter 1991

Chapter 1991

"I understand. I will try my best..." Leon said.

He thought that Alfred wanted his help to defeat Poisonwielder and that he would only be in the way due to his lack of power.

After Leon was told that Poisonwielder was a skilled poison maker and that the Dragon Corps needed Leon's help to produce an antidote against the poison, he agreed to it without hesitation, as it was his duty as a member of the Dragon Corps.

"Mister Glasbey, there's a wide variety of Reaper's Breath. Do you have any information about it that you can send to me? I'll try and see if I can produce an antidote for it!" Leon said.

Reaper's Breath was produced with a combination of five poisonous plants. Since there was no fixed combination to it, there was no fixed antidote for the poison either.

There were hundreds of types of poisonous plants in the world, and Leon needed to know which five plants Poisonwielder used to produce the Reaper's Breath in order to produce its antidote.

It would be much easier to capture Poisonwielder with the antidote in hand.

"I don't have it... Poisonwielder's name was added to the criminal list merely half a year ago, so the Dragon Corps has yet to obtain much information on him... All I know is that he has the Reaper's Breath. We have no clue as to what the components of the poison were..." Alfred said while shaking his head.

"Oh..." Leon's heart sank.

Without detailed information on the Reaper's Breath, it would be impossible for him to produce a specific antidote for the poison.

"What's wrong, Leon?" Alfred felt overwhelmed by an ominous feeling when Leon fell silent.

"Mister Glasbey, truth be told, the Reaper's Breath is a unique poison. If I don't know what plants were used in it, it will be difficult for me to produce an antidote," Leon said truthfully.

"I see... Is there any other way?" Alfred scowled.

"There's a way! Ganoderma has the property of dissolving poison, and it works on most poisonous plants! I can produce a type of Essential Detox Pill with Ganoderma, but I can't guarantee if it could fully counter the effects of the Reaper's Breath. Regardless, I will try my best," Leon replied hesitantly.

The Essential Detox Pill was a type of pill used as an antidote to numerous poisons, but since the Reaper's Breath was a unique poison, Leon did not know if the Essential Detox Pill would work.

Ganoderma could dissolve poison and suppress the effect caused by most poisons. Hence, even if the Essential Detox Pill failed to counter the Reaper's Breath completely, it should help to suppress the effect for a time.

"Good! I will leave it to you, then!" Alfred sighed a breath of relief.

"Sure! I'm not in the best shape right now and won't recover completely until tomorrow afternoon! I need some time to produce the Essential Detox Pills as well, so I won't be able to travel to the western region right away..." Leon said thoughtfully.

"It's fine! I'll talk to the western region Dragon Corps branch and get them to track Poisonwielder down to buy us some time! You can head toward the western region in the morning after tomorrow!" Alfred said.

"Okay! I'll head toward the western region in the morning the day after tomorrow, then!" Leon agreed.

With that, the two ended the call.
