The Ex-Husband's Revenge chapter 2479

Wavering under Leon's sharp gaze, Joshua muttered, "I don't know what you mean, Mister Wolf."

Though he was certain that Leon came from a humble background, Leon's gaze still sent chills down his spine and made him feel uneasy.

"You better not know what I mean!" Loen scoffed.

He could guess what Joshua was plotting, but it was merely speculation. Aside from that, Joshua was Ariella's boyfriend and Loen had a good impression on Ariella.

Out of respect for Renee and Ariella, he decided to let this slide.

"Damn this kid! How arrogant!" Joshua relaxed once Leon looked away, then snapped out of it.

Leon's status could not hold a candle to his. On top of that, he was a capable martial artist, so he had nothing to fear from Leon.

At this moment, he realized how cowardly his reaction earlier was.

Instantly, he was filled with frustration, but it was too late.

Just then, the others' attention was diverted back to the bouquet and they all urged Jaxon, "Alright, Mister Feaks. Just start the bouquet!"

Without further delay, Jaxon stepped over to a temporarily built stage in the middle. "Thank you all for attending this bouquet. Allow me to announce the start of tonight's excitement."

He gave a brief speech, then cut to the chase. "A total of fifteen herbs will be auctioned off tonight. Amongst them, twelve are rare herbs that have grown from three hundred to five hundred years, with the remaining three being spiritual herbs," Jaxon introduced the items and signaled a few guards to step toward the stage.

There were two glass display cabinets on each side and they were covered by red clothes at the moment.

Upon his command, the guards lifted the red clothes, revealing the dried herbs inside the cabinets.

The herbs were all of different shapes and were perfectly kept. There were labels stating each herb's description along with the selling price. The price ranged from 3 million to 10 million.

Naturally, the longer the herbs grew, the more expensive they would be.

Most of the herbs displayed grew for roughly three hundred years. There were only two wild Panax that grew for five hundred years and three normal spiritual herbs.

In terms of effect, spiritual herbs worked far better than rare herbs. Normal spiritual herbs would work better than herbs that grew for five hundred years and rivaled the effect of herbs that grew for seven to eight hundred years.

However, the western region was a unique area.

Experts could easily come across normal spiritual herbs when they hunt for herbs in the mountains. Herbs that grew for five hundred years or above were rarer to find.

Because of this, there were only two herbs that grew for five hundred years and not a single herb that grew for over five hundred years.

In terms of price, Sky County was vast with great resources, so the price for herbs was generally lower than Springfield City. However, normal spiritual herbs and aged herbs are so rare that they were often sold at a rather fixed price.

Amongst the herbs that grew for three hundred years, the prices were set at around 4 million according to their effect. Though herbs that grew for five hundred years couldn't compare with normal spiritual herbs, they were rarer and around the same price as the spiritual herb, selling at around 40 million.
