

The Ex-Husband's Revenge

The Ex-Husband's Revenge chapter 2518-"I'll pay 510 million!" Leon frowned with resignation.

Though he was the one who first proposed to purchase the Rainbow Flower, it was far too rare, and Felton and Jensen made it into an auction.

Hence, he could only raise the price in the hope that they would give up as he did not have any other option.

"I'll pay 574 million!" Felton did not back away and scoffed.

He shared Leon's thoughts and wanted to raise the price so that others would give up.

"Damn!" Jensen and the others' expressions darkened.

Though they were all from families with a total worth of billions, most of their family fortunes were not liquid funds and none of them could move 574 million with ease.

On top of that, both Leon and Felton seemed determined to obtain the Rainbow Flower.

Felton was the son of the Western Boss and was far superior in terms of financial capability and power.

The same applied to Leon, who first paid 287 million for fifteen rare herbs and proposed to purchase the Rainbow Flower with a whopping 510 million.

His wealth seemed boundless. Even if they all continued to bid against one another, they could not compete with Felton or Leon and would only end up crossing them.

"Forget it. We're out!"

Since the price rose too high, Jensen and the others had no choice but to give up.

“Very well!” Felton was satisfied with their reaction and turned to glare at Leon.

574 million was a big fortune and since Jensen and the others already gave up, Leon would have to give up as well if he could not offer a higher price. That way, the Rainbow Flower would belong to him.

However, before he could celebrate his success, Leon’s voice rose again.

“650 million!” Leon said calmly.

Though Cynthion Group had no powerful backer, it was never short on money.

He may not win against Felton in terms of influence and power, but there was no way that he would lose if they were competing with money.

“I knew it!”

“Cynthion Group has so much money!”

The others gasped in shock.

Jensen and the others all guessed that they could not compete with Cynthion Group and gave up earlier. It seemed like they were right after all.

Leon raised the price to a whopping 650 million and did not even break a sweat.

This meant that there was no guessing how deep Cynthion Group’s capability ran and they made the right choice to give up.
