

Chapter 5058

Duncan looked at May 47 and asked:

“Do you always fly out to perform missions?”

May 47 nodded and said, “Yes! Every time we fly.”

Duncan asked, “What state were you in midway?”

“In a coma.” May 47 said truthfully: “When we are about to go out on a mission,”

“We will first take drugs that make people deeply coma, and then wake up and be there.”

Duncan asked again: “Then how do you make sure that you take a plane every time you go out?”

May 47 explained: “Every time I have a mission,”

“I ask my wife to help me calculate the time. Although our time is not very accurate,”

“The error is not too big when the time axis is relatively short;”

“Every time I go on a mission, the time I can’t grasp is the round-trip journey.”

“I can accurately record the time when I perform the mission in the middle,”

“So every time I go back, I check the time with my wife,”

“And use the time she recorded to reduce the time.”

“The time to do the task recorded in my middle is the time spent on the round trip.”

“Generally speaking, whether we go to any place in the world to perform the task,”

“The time spent on the round trip will not exceed six or seven days. At this speed, only the plane can do it.”

Duncan nodded lightly and said, “It won’t take more than six or seven days,”

“Which means that your turnover efficiency is very high,”

“And even the airport you depart from is likely to be near your station.”

After speaking, Duncan remembered something and blurted out:

“Next, we can take two steps. On the one hand, we can find a more complete map,”

“Including satellite cloud images, and find all the islands and airports in the ring area,”

“And then take each ten-kilometer area around the airport to locate the key investigation targets;”

“As for the other hand, start with your transportation!”

May 47 hurriedly asked, “How do you start with the transportation?”

Duncan said: “Although you are flying on a mission,”

“You didn’t go through customs when you entered the United States, right,”

“Because when you woke up, you had already arrived in the United States and completed the entry.”

“Yes.” May 47 Nodding his head, he said, “Every time we perform a mission,”

“We haven’t gone through the customs, and we have already arrived at the place when we open our eyes.”

Duncan continued: "I don't know about other countries, but the United States has attached great importance to aviation safety since 9/11."

"Therefore, it is impossible for the plane you take to enter the United States directly."

"When entering the United States, you must go through customs."

"Therefore, they must have chosen a certain country to be the springboard country."

"First, they will fly the plane to the springboard country,"

"And then immediately arrange for you to sneak across the border by land."

"The entry line is completed."

After a pause, Duncan asked again, "Have you been to the United States before?"

May 47 nodded and said, "I went once a few years ago when I went to Los Angeles."

Duncan continued to ask: "The trip to Los Angeles was the same as the trip to New York,"

"Where you woke up and went back and forth within six or seven days, right?"

May 47 nodded, "Yes."

Duncan smiled slightly and said: "You must have been smuggled to enter the United States,"

"And there are only two ways to smuggle, either by sea or by land,"

"But if it is by sea, it is impossible to achieve a round-trip time of no more than six or seven days,"

"So I feel that you must be the first to fly by plane."

"The springboard country, and then smuggled into the USA by land."

Then, Duncan added: "The United States has only two neighboring countries, Mexico and Canada."

"If it travels by land, it must be one of these two countries, but Canada's aviation control is also very strict."

"So if your plane chooses Canada as the springboard country, you can't get around the process of going through the customs,"

"But the situation in Mexico is different. Mexico is relatively more chaotic."

“A plane avoids customs and directly landed somewhere in Mexico. The possibility should still be very large.”

“I can basically confirm that your station is in the coastal areas or islands of western or Eastern South Asia or eastern Southeast Asia,”

“Not far from the airport, and if you are going to the United States to perform a mission,”

“The plane should first fly to Mexico, and then transfer you by land to New York,”

“And the organization must have another group of people stationed there in Mexico.”

“I think Mexico should have the leads I want.”
